M6

COUNTERMEASURE

M6 Countermeasure Smoke Grenade Launchers for the Stryker Brigade Combat Team

This setup consists of a battery of M6 dischargers plus vehicle-specific mounting adaptors to provide smoke protection over the required angular sectors.

The M6 is a 4-tube smoke grenade discharger that enables combat vehicles to conceal themselves from threat surveillance, target acquisition, and weapon guidance systems. The system provides up to 360° coverage, overhead screening protection.

The M6 provides all-around screening protection and has the ability to interface with Vehicle Integrated Defense Systems.

The M6 is capable of firing all Q-STAG 401 conforming grenades. It is capable of single tube inventory and single tube firing when integrate with the Vehicle Integrated Defense System.

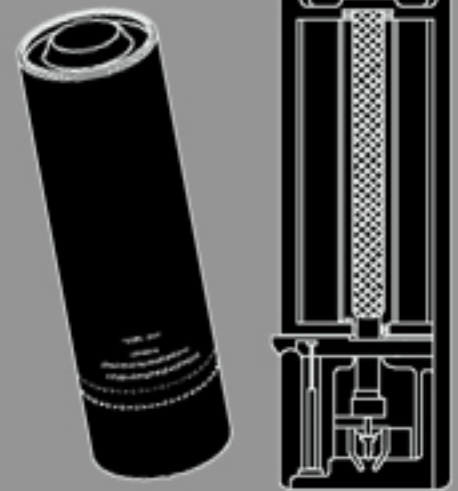

The M6 is currently used on the Stryker family of vehicles.
